

This PDF is the executive cover. Your full pack is on the download page:

1. ai-compliance-playbook.md â India-first operating playbook
2. ai-compliance-checklist.md â 47 controls before a pilot
3. workspace-template.md â inventory / vendor / escalation boards

Direct answer: before a BFSI, health, or government AI pilot you need a data purpose map (DPDP), a risk tier + human oversight path, and a vendor / hosting memo buyers can attach to an RFP. This kit is the shortest path.

Not legal advice. Practical hygiene for MSMEs under ~INR 50L ARR.

Contents (full detail in Markdown playbook)

1. India-first stack of seven questions
2. DPDP-aware data practices â inventory, purpose, cross-border, logs
3. Risk tiers in buyer language (unacceptable / high / limited / minimal)
4. Human oversight pattern â trigger, queue, override, record, appeal
5. Vendor diligence for Indian SaaS reality
6. RFP response pack â five artefacts that win deals
7. 30-day implementation sequence
8. Contrarian note â artefacts beat accuracy theatre

Print the checklist. Import the workspace template into Notion or Sheets.
